

Points Requiring Clarifications – RFQ 006

S#	Clarification/ Information Required	Comments
1.	For the 1G/10G SFPs, please confirm whether Multimode (MM) or Single Mode (SM) SFPs are required.	Multimode (MM)
2.	Please confirm the required bandwidth for the RAAST link. Is the bandwidth 250 Mbps, or will it be higher?	Currently 2 Mbps bandwidth from each ISP (Extendable as per operational requirement). Total two ISPs in number.
3.	Kindly confirm the end-user entity for this project: Karandaaz or BISP, as the RFQ refers to support/services under the BISP name.	BISP
4.	As per the RFQ, the Cisco C8300-1N1S-6T router supports only one NIM slot. Please confirm whether WAN connectivity can be terminated on the 4-port 1G/10G fiber NIM module, or if a separate dedicated WAN interface is required. If a dedicated 10G fiber WAN port is required, a Cisco C8300-1N1S-4T2X may be more appropriate. Please confirm.	WAN connectivity can be terminated on the 4-port 1G/10G fiber NIM module.
5.	Kindly confirm whether the required training is to be conducted locally (in Pakistan) or internationally.	Local (in Pakistan)
6.	Kindly reduce the firm registration time up to 3 x years under Technical Pre-qualification Criteria for the attached tender	Bidders are required to provide proof that they are a firm/company registered or incorporated in Pakistan for the last five (5) years, as specified in the RFQ
7.	Does the requirement specifically mandate five (05) completed deployments of Cisco Enterprise Routers only? OR Can the experience requirement be fulfilled through a combination of Cisco infrastructure projects, for example: Three (03) Cisco Enterprise Router deployments, and Two (02) or more deployments of other Cisco solutions such as Cisco Switches, Firewalls, or related networking products?	The procurement pertains solely to the Cisco router hardware, so the specifically mandated five (05) completed deployments of Cisco Enterprise Routers only.
8.	Is the DNA subscription required if yes wat type of subscription is required	Cisco DNA Essentials subscription (or equivalent) is sufficient

9.	Technical BoQ mentions 3 Years Hardware & Software with NBD Support while the Scope of work point 3.9 mentions Supplier must commit to the OEM backed SLA, for all scope requirements for 24 x 7 coverage with a four-hour hardware replacement time. Please clear this ambiguity whether NBD or 24x7x4 replacement is required.	As per clause 1.1 and 3.2 of the scope of work, Next Business Day support is required. Clause 3.9 is updated accordingly and a corrigendum to the RFQ has been issued on Karandaaz website to reflect the same. Corrigendum can be downloaded using the link below: https://www.karandaaz.com.pk/procurement/open/corrigendum-to-rfq-006-supply-installation-and-maintenance-of-enterprise-routers
