

CUST Hackathon 2026

Evaluation Rubric (Round 1)

Criterion	Weight	1=Poor	2= Below Average	3= Satisfactory	4=Good	5=Excellent
Solution Relevance & Effectiveness	20%	The proposed solution does not adequately address the given problem statement.	The solution addresses only a limited portion of the problem requirements.	The solution addresses the main requirements of the problem statement.	The solution effectively addresses the problem and demonstrates practical applicability..	The solution comprehensively addresses the problem and demonstrates strong potential for real-world adoption.
Innovation & Differentiation	20%	Solution closely resembles existing approaches with little originality.	Limited innovation beyond common approaches.	Some innovative features or ideas are demonstrated.	Solution presents a clearly differentiated and creative approach..	Solution demonstrates exceptional innovation with a unique and compelling value proposition.
Technical Implementation	30%	Prototype is incomplete, non-functional, or fails during demonstration.	Limited functionality is demonstrated; major features are missing or not working reliably.	Core features are functional and demonstrate a workable solution to the problem.	Most features are fully functional; the solution is stable and demonstrates sound technical implementation.	Solution is robust, well-integrated, and demonstrates exceptional technical quality, reliability, and completeness.
Validation & Reliability	15%	Little or no evidence of testing; functionality appears unverified.	Basic testing performed on a limited set of features or scenarios.	Core functionality has been tested and key features are demonstrated to work correctly.	Multiple features and scenarios have been tested; evidence of systematic	Comprehensive testing is demonstrated, including validation of key functionalities, edge

					validation is provided.	cases, and solution reliability.
Feasibility & Scalability	15%	Significant technical, operational, or practical barriers make implementation unlikely..	Solution shows potential but faces major challenges for deployment or adoption.	Solution is reasonably feasible but requires further development to address implementation challenges.	Solution is practical, implementable, and demonstrates clear potential for wider adoption.	Solution is highly practical, scalable, and demonstrates strong potential for real-world deployment and growth.

Final Score Calculation

Weighted Score = (Criterion Score ÷ 5) × Criterion Weight

Final Team Score = Sum of all weighted scores

Maximum Score = 100

Tie-Breaking Order

1. Technical Implementation
2. Innovation & Differentiation
3. Solution Relevance & Effectiveness
4. Feasibility & Scalability
5. Judges Committee

CUST Hackathon 2026

Evaluation Rubric (Round 2)

Criterion	Weight	1=Poor	2= Below Average	3= Satisfactory	4=Good	5=Excellent
Value Proposition	40%	Value proposition is unclear or unconvincing.	Some value is identified but benefits are not clearly articulated.	Solution provides clear value for the target users.	Strong value proposition with well-defined benefits and differentiation.	Exceptional value proposition that addresses a significant need and demonstrates compelling advantages over alternatives.
Market Viability & Growth Potential	40%	Limited potential for adoption or sustainability.	Adoption is possible but significant barriers exist.	Demonstrates reasonable market potential and scalability.	Strong potential for growth, adoption, or commercialization.	Exceptional potential for large-scale adoption, market success, or societal impact.
Pitch & Delivery	20%	Presentation is unclear, disorganized, or difficult to follow.	Key points are communicated but lack clarity or confidence.	Clear presentation with adequate explanation of the solution.	Well-structured, engaging, and persuasive presentation.	Outstanding pitch that is concise, confident, memorable, and highly convincing.

Final Score Calculation

Weighted Score = (Criterion Score ÷ 5) × Criterion Weight

Final Team Score = Sum of all weighted scores

Maximum Score = 100

Tie-Breaking Order

1. Value Proposition
